**Report on Activities for
the Implementation of the Initiatives for-**

1. Alternate Sources of Energy and Energy Conservation Measures:

We strive to save energy in the college. In the Induction Programme held at the beginning of every session, the students are advised to use electric devices properly. They are intimated to switch on and switch off lights and fans in the classroom if they don't need these devices. LED bulbs and energy saver fans have been installed to save energy. The Infrastructure Maintenance Committee members and our Principal keep watch on the management of energy usage in the institution. These collective efforts resulted in the reduction of the use of energy in the college. The department of Maharashtra State Electricity Corporation Limited has applauded energy conservation measures taken by our institution and has certified accordingly.

2. Management of various Types of Degradable and Non-degradable Waste:

The students of the college are notified not to throw any kind of waste in the premises. Enough number of Dust Beans are placed at various spots in the college. The students are advised to use these dust beans to keep campus clean. The local Municipality Waste collectors come to the college every week to collect such waste.

3. Water Conservation:

Utmost care is taken by the institution for water conservation. The whole premises is open land that absorbs the rainwater. The flowing rainwater comes close to the well where we block it and conserve it. The result is that the level of water in the well remains very high. The rainwater harvesting system has been installed to check it from flowing.

4. Green Campus Initiatives:

The college has got a very beautiful and fenced campus at the centre of the town. Various types of trees have been planted to keep it green. A small garden has also been developed. The plants in the garden are donated by the management members, teachers and non-teaching staff in the memory of their birthdays. This has also helped

in keeping the premises green and cold during summer season. The Campus Beautification Committee takes care of this garden and trees.

5. Disabled-Friendly, Barrier Free Environment:

Although we don't have any divyangajan student in our college currently, we have installed necessary facilities to create disabled-friendly and barrier free environment in the institution. We have signed MoU with local Disha Divyang Association. They arrange monthly meetings in the college. Hence, many Divyangajans visit college regularly and take advantage of the facilities. We organized a district level gathering of Divyangajans on 3rd December 2019 to acquaint them with various schemes of the government for physically handicapped persons. Facilities such as ramp, divyang-friendly toilet, three-wheeler and signage boards are available in the college.
